

Day 2 – Microsoft Entra RBAC

Objective

Learn how Microsoft Entra administrative roles work and how to apply the **principle of least privilege**.

Lab 1: Explore Administrative Roles (20–30 minutes)

Go to:

Microsoft Entra admin center → Roles & admins

Find and open these roles:

- Global Administrator
- Helpdesk Administrator
- User Administrator
- Authentication Administrator
- Security Reader

For each role, record:

Role	What can it do?	Typical use case
Global Administrator	Full control of tenant	IT administrators
Helpdesk Administrator	Reset passwords for most users	IT support
User Administrator	Manage users and groups	Identity management
Authentication Administrator	Manage authentication methods	IAM team
Security Reader	View security reports	SOC analysts

Lab 2: Assign the Helpdesk Administrator Role (30–40 minutes)

Step 1

Go to:

Roles & admins → Helpdesk Administrator

Step 2

Click:

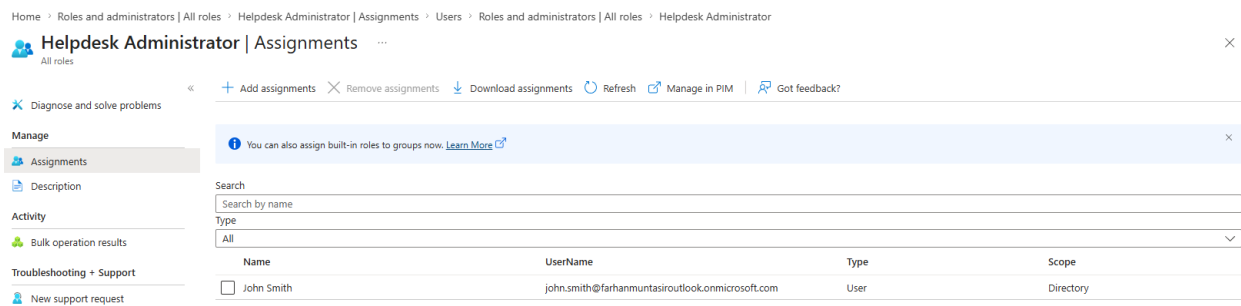

+ Add assignments

Assign the role to:

John Smith

Step 3

Verify the assignment appears in the role members list.

Home > Roles and administrators | All roles > Helpdesk Administrator | Assignments > Users > Roles and administrators | All roles > Helpdesk Administrator

Helpdesk Administrator | Assignments

All roles

Search

Search by name

Type

All

Name	UserName	Type	Scope
☐ John Smith	john.smith@farhanmuntasiroutlook.onmicrosoft.com	User	Directory

Lab 3: Test the Role (30–45 minutes)

Open **John Smith's** user account.

Observe:

- Which roles are assigned?
- Is John a Global Administrator?
- What permissions would a Helpdesk Administrator have?

If you have another browser profile or an Incognito window, you can sign in as **John Smith** and see what administrative actions are available. If you don't want to sign in as John yet, that's okay—you can review the role permissions in the portal.
