

Day 6 – User Authentication Methods

Objective

Configure authentication methods for a Microsoft Entra ID user.

Step 1: Add a Phone Number

1. Click **Phone number**.
2. Enter your mobile number.
3. Choose **Mobile**.
4. Click **Add**.

Take a screenshot.

Step 2: Add an Email

1. Click **Add authentication method**.
2. Select **Email**.
3. Enter another email address you can access (not the same Microsoft account email if possible).
4. Save.

Take a screenshot.

Step 3: Create a Temporary Access Pass

You've already done this in Day 4, but for this lab you can:

- Create another Temporary Access Pass **or**
- Verify the existing one.

Take a screenshot.

Step 4: View Authentication Methods

Your page should show several registered methods, for example:

- Phone Number
- Email
- Temporary Access Pass

Take a screenshot.

New support request

The Revoke multifactor authentication sessions control has been updated. Learn more at <https://aka.ms/RevokeSessions>.

Authentication methods are the ways users sign into Microsoft Entra ID and perform self-service password reset (SSPR). The user's "default sign-in method" is the first one shown to the user when they are required to authenticate with a second factor - the user always can choose another registered, enabled authentication method to authenticate with.
