

Day 26 – IAM Ticket #004: Administrative Roles and RBAC

Scenario

Help Desk Ticket

The IT Manager requests that **Alex Brown** be granted **User Administrator** permissions to manage users without giving full Global Administrator access.

Your job is to assign the correct Microsoft Entra role using **Role-Based Access Control (RBAC)**.

Objective

- Review Microsoft Entra built-in roles.
- Assign the **User Administrator** role.
- Verify the assignment.
- Understand least privilege.

Step 1 – Open Roles and Administrators

Navigate to:

Microsoft Entra Admin Center

→ Identity

→ Roles & admins

To create custom roles, your organization needs Microsoft Entra ID Premium P1 or P2. Start a free trial. →

① Your Role: Global Administrator and 3 other roles

Administrative roles

Administrative roles are used for granting access for privileged actions in Microsoft Entra ID. We recommend using these built-in roles for delegating access to manage broad application configuration permissions without granting access to manage other parts of Microsoft Entra ID not related to application configuration. Search by name or description

Add filters

Role	Description	Privileged	Ass...	Type
☐ Agent ID Administrator	Manage all aspects of agents in a tenant including identity lifecycle operations for agent blueprints, agent service principals, agent identities, and agentic users.	PRIVILEGED	0	Built-in
☐ Agent ID Developer	Create an agent blueprint and its service principal in a tenant. User will be added as an owner of the agent blueprint and its service principal.		0	Built-in
☐ Agent Registry Administrator	Manage all aspects of the Agent Registry service in Microsoft Entra ID		0	Built-in
☐ AI Administrator	Manage all aspects of Microsoft 365 Copilot and AI-related enterprise services in Microsoft 365.	PRIVILEGED	0	Built-in
☐ AI Reader	Read all aspects of Microsoft 365 Copilot and AI-related enterprise services in Microsoft 365.	PRIVILEGED	0	Built-in
☐ Application Administrator	Can create and manage all aspects of app registrations and enterprise apps.	PRIVILEGED	0	Built-in
☐ Application Developer	Can create application registrations independent of the 'Users can register applications' setting.	PRIVILEGED	0	Built-in
☐ Attack Payload Author	Can create attack payloads that an administrator can initiate later.		0	Built-in
☐ Attack Simulation Administrator	Can create and manage all aspects of attack simulation campaigns.		0	Built-in
☐ Attribute Assignment Administrator	Assign custom security attribute keys and values to supported Microsoft Entra objects.		0	Built-in
☐ Attribute Assignment Reader	Read custom security attribute keys and values for supported Microsoft Entra objects.		0	Built-in
☐ Attribute Definition Administrator	Define and manage the definition of custom security attributes.		0	Built-in
☐ Attribute Definition Reader	Read the definition of custom security attributes.		0	Built-in
☐ Attribute Log Administrator	Read audit logs and configure diagnostic settings for events related to custom security attributes.		0	Built-in

Step 2 – Search for User Administrator

Search for:

User Administrator

Open the role.

Step 3 – Review Role Permissions

Review:

- Description
- Permissions
- Eligible assignments (if shown)

Understand that this role can:

- Create users
- Update users
- Reset passwords (for non-admins)
- Manage group memberships

It **cannot** perform Global Administrator tasks.

Summary

Name:

User Administrator PRIVILEGED

Description:

Users with this role can create and manage all aspects of users and groups. Additionally, this role includes the ability to manage support tickets and monitors service health. Some restrictions apply. For example, this role does not allow deleting a global administrator. User Account administrators can change passwords for users, Helpdesk administrators, and other User Account administrators only
This role is considered privileged because one or more of its permissions are privileged. [Learn more](#)
