

Day 19 – OAuth 2.0 and OpenID Connect Basics

Objective

Understand how OAuth 2.0 and OpenID Connect are used to authenticate users and authorize applications in Microsoft Entra ID.

Skills You'll Learn

- OAuth 2.0
- OpenID Connect (OIDC)
- Access Tokens
- ID Tokens
- Refresh Tokens
- Microsoft Entra Authentication

Step 1 – Open App Registration

Go to:

Microsoft Entra admin center

→ Identity

→ Applications

→ App registrations

→ IAM-Lab-App

Screenshot 1

- App Registration Overview (or Enterprise Application Overview if the App Registration is unavailable)

Home > App registrations

IAM-Lab-App

Search < Deactivate Delete Endpoints

- Overview
- Quickstart
- Integration assistant
- Diagnose and solve problems

Manage

- Branding & properties
- Authentication (Preview)
- Certificates & secrets
- Token configuration
- API permissions
- Expose an API
- App roles
- Owners
- Roles and administrators
- Manifest

Support + Troubleshooting

- New support request

Got a second? We would love your feedback on Microsoft identity platform (previously Azure AD for developer). →

Essentials

Display name	: IAM-Lab-App	Client credentials	: Add a certificate or secret
Application (client) ID	: 5880804f-6ecb-4c8f-8954-a76aa9e60bd7	Redirect URIs	: 1 web, 0 spa, 0 public client
Object ID	: 81b17707-5416-4702-8c6d-f660912c546f	Application ID URI	: Add an Application ID URI
Directory (tenant) ID	: 1e95522d-4bbb-4ade-b300-c9049924da7f	Managed application in L...	: IAM-Lab-App
Supported account types	: My organization only	State	: Activated

Azure Active Directory Authentication Library (ADAL) and Azure AD Graph no longer receive new feature updates. We continue to provide technical support and security updates. Applications should be upgraded to Microsoft Authentication Library (MSAL) and Microsoft Graph. [Learn more](#)

[Get Started](#) [Documentation](#)

Build your application with the Microsoft identity platform

The Microsoft identity platform is an authentication service, open-source libraries, and application management tools. You can create modern, standards-based authentication solutions, access and protect APIs, and add sign-in for your users and customers. [Learn more](#)

Step 2 – Review Authentication Settings

If you can access the App Registration:

1. Click **Authentication**.
2. Review:
 - a. Redirect URIs
 - b. Supported account types
 - c. Platform configurations

Screenshot 2

- Authentication page

Step 3 – Learn the OAuth 2.0 Flow

Understand the basic authorization flow:

No configuration is required—this step is about understanding the process.

Step 4 – Token Types

Document the purpose of each token:

Token	Purpose
ID Token	Confirms the user's identity to the application.
Access Token	Allows the application to call APIs such as Microsoft Graph.
Refresh Token	Obtains a new access token without asking the user to sign in again.
